

DEAN TORIUMI, MD

TORIUMI FACIAL PLASTICS

Education and Training:
MD, Rush Medical College

Residency: Northwestern University

Fellowships: Tulane University Hospital;
University of Washington

Dean Toriumi, MD, and his entire team are delighted to announce the opening of his new private practice office, Toriumi Facial Plastics. We welcome new and former patients to our new space at 60 East Delaware Place, just steps from the Magnificent Mile.

The team is dedicated to the highest level of care in facial plastic surgery, specializing in rhinoplasty/secondary rhinoplasty, areas in which Dr. Toriumi is recognized as a preeminent expert with a global reputation for technique, precision, and compassionate care.

Board-certified in facial plastic and reconstructive surgery as well as otolaryngology, Dr. Toriumi has earned his reputation as a world-recognized and highly sought-after surgeon, an honor that comes from successes with hundreds of satisfied patients as well as the endorsements of his peers.

The practice's commitment to the most personalized care — including a treatment plan designed to meet each patient's aesthetic and functional needs and to ensure long-term results — is always highly customized, and always job one. Rhinoplasty and secondary rhinoplasty (a procedure designed to correct problems from previous surgery) in particular are highly complex procedures and require a unique sensitivity to patient needs — and a precise technique, one Dr. Toriumi continues to refine after more than 30 years of practice.

Facial plastic surgery patients are sophisticated and seek the best results, delivered in a safe, comfortable, and professional environment. Dr. Toriumi and the team at Toriumi Facial Plastics provide the ultimate in quality care and personal attention, meeting patients' clinical, aesthetic, and personal needs — in every case, at every turn.

Areas of expertise:

- Rhinoplasty (nose surgery)
- Secondary rhinoplasty
- Face-lift surgery
- Upper and lower blepharoplasty (eyelid) surgery
